

Booking agent that can be tested before deployment

A provider-neutral starter kit for Vapi, Retell and ElevenLabs. Includes dialog policy, calendar tools, privacy defaults, test cases and rollback checklist.

Included	Proof in package
Agent policy	agent-config.json
Calendar and handoff tools	tools.json
Test conversation	sample-call.txt
Launch and rollback	deployment-checklist.md

Call flow

1. Disclose recording and identify intent. 2. Collect service and preferred time. 3. Check calendar. 4. Offer up to two alternatives. 5. Repeat booking details and request explicit confirmation. 6. Create one idempotent booking. 7. Send confirmation or transfer to a person.

Safety defaults

No medical advice. Minimum data collection. Human handoff for complaints, payment disputes, medical questions and tool failures. API keys stay outside distributed JSON files.

Acceptance scenarios

Scenario	Expected result
Available slot	One confirmed booking
Occupied slot	Two alternatives
Duplicate webhook	No duplicate booking
Calendar timeout	Human handoff
Medical question	No advice; handoff
Cancellation	Explicit confirmation

Release notes

Version 1.0.0 - initial Beauty Salon booking workflow, provider-neutral schemas, privacy defaults and restore checklist. Tested integrations listed as compatible templates; live provider credentials and salon-specific calendar setup are not bundled.
